BEFORE INSTALLATION YOU NEED TO PURCHASE:

2 X 30A AUTOMOTIVE BLADE FUSE (COLOUR: GREEN)

1 X 1A AUTOMOTIVE BLADE FUSE (COLOUR: BLACK)

3 X INLINE FUSE HOLDER (TO TAKE BLADE FUSES)

RECOMMENDED MINIMUM CABLES SIZES:

INPUT (RED): 6mm² CONDUCTOR CROSS SECTION (84/0.3mm)

OUTPUT (BLUE): 6mm² CONDUCTOR CROSS SECTION (84/0.3mm)

GROUND (BLACK): 2.5mm² CONDUCTOR CROSS SECTION (35/0.3mm)

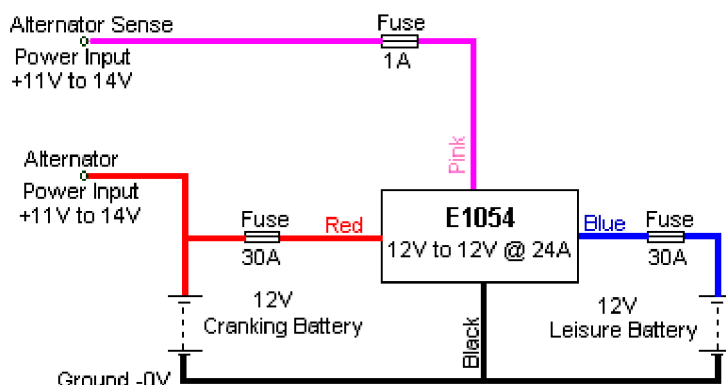

The Charger starts when the voltage reaches approximately 12V.

This Unit = 2 X E914 12A Battery Chargers wired in parallel to form a single 24A module

Wired as a fully automatic Charger

The Pink Control Wire Connection is wired directly to the +ve Connection of the 12V Cranking (Donor) Battery to switch the Charger on and off automatically.

In this case the Control Wire Connection senses the 12V Cranking (Donor) Battery Voltage and switches the Charger on only when the 12V Cranking (Donor) Battery is being charged. The Unit automatically controls the maximum charge into the 12V Leisure (Recipient) Battery preventing it from becoming over-charged / damaged and prevents the 12V Cranking Battery (Donor Battery) from becoming flat / exhausted.

Wired to only operate when the engine is running

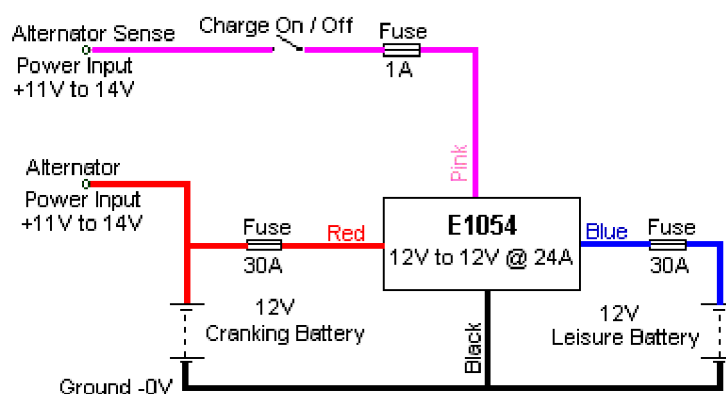

The Pink Control Wire connection is wired to any +ve connection which becomes live when the Ignition is switched on. The Unit automatically controls the maximum charge into the 12V Leisure (Recipient) Battery preventing it from becoming over-charged / damaged.

Wired as a manually operated Charger

The Pink Control Wire Connection is wired via a Switch to the +ve Connection of the 12V Cranking (Donor) Battery to switch the Charger on and off manually.

In this case the Operator can control when the Battery Charger is switched on or off.

If left on, the Unit will automatically control the maximum charge into the 12V Leisure (Recipient) Battery preventing it from becoming over-charged / damaged and prevent the 12V Cranking Battery (Donor Battery) from becoming flat / exhausted.

This Battery Charger has been designed using a building block system to obtain the power needed to suit your requirements

This Unit can be provided with a Charging Indicator.

To request a Charging Indicator, please add an "L" to the Part Number, i.e.: E1054-L
